The drawings are objected to because they are unclear and hard to refer to.

Applicant is reminded that a petition maybe needed if photo pictures are used.

On page 6, lines 4-5, of this specification, Applicant refers to an article "Evaluation of a Hybrid Piston...January 2002". Is that article a prior art or Applicant's appendix? If it's a prior art, is it possible to submit that after reviewing this Office Action? Also, if Applicant knows of any other prior art, please submit the prior art to the Examiner to fully consider and thoroughly examine this application.

Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It's unclear about the structure of this invention. Figure 2 is so unclear that the connection between the detonation engine and the piston engine cannot be understandable. In figure 1, reference numeral 10 is referred to as a hybrid engine, but it seems like only a piston engine is shown. Please provide new drawings and description to enable a person having ordinary skill in the art to understand.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Winfree et al., Meholic, Ericson, and Dodds et al disclose detonation engines.
